THE QUINS ARE DOING WELL: No mother in Poland can equal her popularity wit h that of Leokadia Rychert—the mother of quintuplets born on May 12, 1971. There w ere two girls and three boys who came to the world at the hospital of the Gdansk Medical Academy. This was the first case of quins' birth in Europe and second in the world. The greatest success is that the children — who are already 10 months old are doing fine, developing normally and put on weight. The quins are under medical care of the physicians fro m the Mother and Child Institute of the Gdansk Medical Academy. The nursing personnel assigned to the quins helps the lucky mum in h[illegible] difficult task. (In the picture) Leokadia Rychert with th e quins. ("Polish Facts On File").
